## LORD NORTHCLIFFE SOUNDS A NOTE OF WARNING FOR BRITAIN

From Chicago He Issues Statement Declaring the Necessity for Great Britain to Prepare for War With Germany.

### JAPANESE MENACE NOTHING COMPARED TO GERMAN PERIL

History Repeating Itself in Secret Preparation by Germany for War. England has not Wakened up Yet.

Eminent Newspaper Owner Cities Germany's Attitude in Armed Peace Conference, the Complete Consensus Over the German Plan, and the Hard Press for His Extraordinary Services of Activity on Part of Germany to Make War on Great Britain for Supremacy.

Chicago, Sept. 28.—Lord Northcliffe, owner of the London Times and one of the most prominent and influential British newspapers, while here yesterday, sounded a note of warning for England to prepare for war with Germany. Lord Northcliffe dictated the following:

"The Germans are so busy with the affairs of their own gigantic contention that they have not the time to devote to the study of European politics. They are too busy with their changes than those of the United States. There is an important difference between the hostility exists between the peoples of Great Britain and of United Germany. From childhood I have travelled extensively throughout most of the German Empire, and I can assure you that outside that, outside the main family connection, and I venture to say that, outside the usual body of the German, there is one man every country there is little hostility to the British on the part of the Germans. And on the other hand there is no English dislike of Germany. On the contrary, our statement in adapting German legislation in no form of flattery. The Germans will be well pleased with our proposed bill, and we have given the government's insurance, their labor bureaus, and a great many other legislative improvements which would be just as vital to the United States as they seem to be to Great Britain."

"Way, then, if so happy a state of affairs exists between the two nations should we not say nothing to the people of England to the possibility of war?"

"Turn back to us. We have any right to do so. France and Prussia."

"History Repeating Itself."

"There was no hostility on either side, but a real desire of Bismarck's influence to have the German Empire, on the great German empire builder, will acknowledge there was immense personal animosity on both sides, but a preparation that was kept secret as far as possible and which also, as far as possible, was kept secret from the German people. The king, who is adverse to having an absolute constitutional monarchy, is also adverse to having favorable to the passage of the budget of the State. One of the reasons he is adverse to the budget is that he is adverse to the tax reformers, on the other hand, demand its reduction, and it is the king's desire to have his budget, the Lord, led by Lord Milner, will support this policy."

**WEATHER IS UNPRECEDENTED.**

"No Previous Season in West Has Been as Fine."

Winnipeg, Sept. 28.—Owing to the unusually fine weather prevailing, this morning reports are coming in from the country of a great scarcity of water, and from time to time up in the prairies, while as a consequence thereof, are severely handicapped, in some instances having to team nine or ten carts full of water. Yesterday weather conditions are quite without precedent for this month in the history of the prairie. In the various gardens flowers are still blooming, while roads have been so far inundated by rain, and marrows being affected by the frost of last week.

The Citizens' Band and the Highland Pipes will instill a martial spirit in the masses, and along with the band, the brilliant colors and the luminous glare of red fire, it will make a long to be remembered.

The Public School Brigade will assemble on McGillivray Avenue, between 8 p.m. and 9 p.m., and from present indications the showing that young Canadians are still able to do their duty.

The different divisions will be in charge of competent marshalls, the Lord, led by Lord Milner, will be present to receive them.

**MEDICAL FEDERATION UP.**

Representatives of Western Councils Meet at Banff.

Banff, Sept. 29.—A meeting of the medical council of the Canadian Medical Association was held here today to consider the advisability of forming a Federation of the medical associations of Alberta provinces, who welcomed the visitors. Dr. Spanke, member of the present Dr. Monro, of Vancouver, was elected secretary.

After the address of Dr. Monro, it was taken to view a hundred and one exhibits, and to join the excursion to the Argentinian Republic, nearly all of it from the Argentinian side.

**CAMPING TWO SITUATIONS.**

"Two or three days ago I was at San Francisco, where your government had sent an indemnity of money in fortifying the Golden Gate against an imaginary Japanese attack. This morning I am in the Pacific slopes, the Japanese, as well as they are by a great war, including the whole of the Japanese population, their situation is an immense distance from you with no outlet for their surplus. They have looked upon as a dangerous opponent. Even if they were possible for them to cross the Pacific, they could not do more than a ridiculous assumption, having in view a hundred and one contingencies, and the Japanese alliance—what damage could they do?"

**THE ANGLO-GERMAN ANALOGY.**

"Now, I think that the Japanese, after eleven hours' distance, have a population of 100 million, and are constructing a navy as rapid as you would be wise to give me, and I could not conceive of an army that could be built up to such a point of strength as the Japanese."

"I think it is suggested in the American papers that there is some probability of a Japanese alliance with them. Our public journals, with these were, our public journals have been warned by the prime minister, by the foreign office, by the majority of our leading public men, such as Mr. Frederick Harrison and Lord Roberts, by prominent journalists, that this would lead to European compli-

**DUNCAN MARSHALL, Manager.**

WEDNESDAY, SEPTEMBER 29, 1909.

Lethbridge is n-- talking of circuit  
cars. The Edmonton spirit is con-  
tagious.

Mrs. Annie Besant says she has lived  
before and will live again. Let us hope her activities take another direc-  
tion when she comes back.

The Calgary Herald apprises us of an article from the Toronto  
Newspaper Publishing Association:  
"Break down paper lines." Consider-  
ing the source of the advice and the  
repeater of it, "Don the Mask" would  
come nearer expressing the idea be-  
hind it.

**Mail and Empire.**—"The one idea  
that Buffalo was the gateway in  
which the grain naturally, and as by  
the force of gravity, tended to go  
was held by few Canadians. The pol-  
icy of the Canadian politicians who were  
"carrying out our grain" and the  
transportation policy that would  
open Canadian channels for Cana-  
dian traffic are now silent about the  
compelling attraction of the United  
States. The mail and the United States  
"route to the sea." The Mail lets its  
tail down very easily, much more  
easily than the electors did. If the  
organs of Little Canada are as  
"silent" now as they are not in credit  
to the mail and the Post Office that lag  
in their present to the new situation  
being opened till then, it shows that  
the end thereof was political death. And  
the Mail did more than any of the rest  
of them to lead its friends into the  
old fashioned ways. Whether or no  
we shall find out when Parliament  
meets again.

Mr. A. E. Kemp, ex-M.P., East Renfrew, writes the Bulletin regarding a  
reference made in his article some time ago to an alleged interview with him which was published by the  
newspaper. It was pointed out in  
the Bulletin's article that Mr. Kemp  
had "unquestionably" denied the  
statement made by the political prin-  
ciples embodied in the resolution of  
the United States tariff. That he  
expressed any such views, or said any-  
thing which could be reasonably in-  
terpreted as expressing them, Mr. Kemp  
unquestionably denies. The de-  
nial of course was made in the  
course of an interview which he  
accepted and due sympathy extended.  
Mr. Kemp for having selected so un-  
reliable a medium as the *Washington  
Times* through which he could express  
his views to the Western public. These  
views, or one of them, may be made clear, he kindly encloses a copy  
of what he did tell the *Telegraph* and  
what he said to me that *Grimsby*  
"does appear to me that Great Britain  
adopts a tariff within the Empire. This  
being as low as it can go, could be  
more commercially independent than  
this Empire or any part thereof with  
its great variety of products to ex-  
change. Looking at this question  
from the very lowest motives, and I  
do not wish to disregard that senti-  
ment, as far as I can see, the Empire  
must give it its interest to ensure  
such a movement. It strikes me  
we should try and assist in bringing  
about mutual interests in trade mat-  
ters." This paragraph, of course,  
does not say anything about the possi-  
bility for preferential tariffs which would  
be opened up if the Old Country saw  
fit to impose a duty on imports and  
how even the *Washington Telegraph*  
could wish this matter out of the  
way. At the moment the tariff revision  
across the ocean must excite some wonder.  
In conclusion, Mr. Kemp invites criticism  
on his proposal, but very pro-  
perly adds that he is only writing for view  
what he does not hold. He says  
he says, so far as his knowledge goes  
are not held by any political party  
in Canada. It is impossible to re-  
sist the suspicion that Mr. Kemp's  
knowledge of the views and aims of

his late Parliamentary leader and  
associates is hardly as full or as  
close as it might be. To this perhaps  
may be attributed the circumstance  
that some gentleman was chosen  
as East Taylor had been chosen, whose  
business stand, or we claimed to  
stand, to benefit immensely from the  
elevation of the tariff, propose a com-  
mission to deal permanently with the  
tariff. The country might be  
assured that the members of the com-  
mission are not likely to be the  
prophets of the proposal that the well-  
known business man, Mr. Galt, has  
written to the *Advertiser* and the *Advertiser*  
is right in doing so. The suggestion  
is neighter good nor bad. The failure  
of the failure to do so, however, is  
what they have in view. For  
as from the blank assurance of the  
Opposition organs that the world  
will be the better off when the  
tariff is raised, the *Advertiser* asks  
why a commission is wanted. Certainly  
that end is more likely to be the  
profit of the proponents than the well-  
known business man, Mr. Galt, has  
written to the *Advertiser* and the *Advertiser*  
is right in doing so. The suggestion  
is neighter good nor bad. The failure  
of the failure to do so, however, is  
what they have in view. For

The Department of Trade and Com-  
merce have issued a blue book show-  
ing the volume of Canadian trade, by  
years, since 1867.

From Canada and the United  
States. From the Mother Land we  
last year bought goods to the value  
of 70 million dollars, and to her we  
sold 10 million dollars' worth of pro-  
ducts. From France we bought  
goods to the value of 10 million  
dollars and to her we sold goods to the  
value of 5 million dollars.

If anybody imagines that in  
one of those figures there is a  
margin of error, it is well to note  
that Canada's tariff is still with

Canada he must hold that the Re-  
publican party has lost faith in the  
maxim that it is better to give than to  
receive. From France we bought  
goods to the value of 10 million  
dollars and to her we sold goods to the  
value of 5 million dollars.

This trifling volume in comparison  
with the tremendous total export and import trade of the  
Republic, suggests how large a  
percentage of the revenue of the  
country is derived from the newly  
opened trade.

Now we bought during the last year 10  
million dollars' worth of goods and  
sold to the United States 9 million  
dollars.

If anybody imagines that in  
one of those figures there is a  
margin of error, it is well to note  
that Canada's tariff is still with

opened trade.

Now we bought during the last year 10  
million dollars' worth of goods and  
sold to the United States 9 million  
dollars.

If anybody imagines that in  
one of those figures there is a  
margin of error, it is well to note  
that Canada's tariff is still with

Canada he must hold that the Re-  
publican party has lost faith in the  
maxim that it is better to give than to  
receive. From France we bought  
goods to the value of 10 million  
dollars and to her we sold goods to the  
value of 5 million dollars.

This trifling volume in comparison  
with the tremendous total export and import trade of the  
Republic, suggests how large a  
percentage of the revenue of the  
country is derived from the newly  
opened trade.

## ENGLISHMEN ARE BORN PESSIMISTS HE SAYS

Lord Northcliffe, in Chicago, in interview, Deals With Temperamental Differences Between His Countrymen and Americans—Pays Tribute to Roosevelt.

Chicago, Sept. 28.—Lord Northcliffe, better known as Alfred Harmsworth, owner of the London Mail and many other publications in England, arrived in Chicago today from California in his first visit to the U.S. Mrs. Mrs. Mrs. Chas. Purse, the London, and Evelyn Wrench, of the Overseas Daily Mail. After breakfast on the car, the party visited the downtown district. Later, when it was time to get back to the city in a taxicab, the party had been joined by the United States and Canada. Owing to the absence of information regarding the visit here no one was at the depot to meet them.

In an interview Lord Northcliffe declared he had decided to make a small tariff, "on that every man may work." He expressed surprise that the United States would allow a tariff sufficient to cripple its trade overseas.

### Differences Is Marked.

"I have observed that the difference between the Americans and the English is that the former are all optimists and the latter are all pessimists."

"What do you think of the Chinese?" he was asked.

"Excellent, most excellent. I know your papers well, the Daily News especially. The papers of this city are second to none. If you want to go there, you ought to have a fine piece here, with your population."

"What do you think is the real difference in a newspaper man?"

"He must do what your university is doing; he must educate. Every time he writes, he must teach. A man who does not degrade and demoralize, as carpers have shamed, is up to date."

"Do you find that the newspaper public in this country differs materially?"

"Not at all, the public is the same from Shanghai to Nova Scotia."

After the discussion of the principle issues some long and disposed of in brief.

### Compliment to Roosevelt.

"You have one friend in our country, the president, Theodore Roosevelt. He is a splendid man. One nation does not need another like that for their men, like that."

"Do you believe that he will not represent the United States?"

"Why can I doubt it? Everywhere I have been, the people have talked about him. You know, the American taxpayer is nothing like it in Europe, such hero worship, he deserves it."

"Do you believe he will be ranked among the greatest statesmen of the world?"

"Assuredly, I do."

Speaking of the difference between the English and American temperament, he said: "The English is born pessimistic. He is never content with what he has, and he is always looking beneath to find something wrong. He is never sure that he is right, and he is always sure that he is wrong. Americans on the other hand are radical optimists. A glance at the Englishman's face tells you that one of you believe that you are the greatest people. You are taking up what you have got, and you are. And believe that the future of America is great. Even if you are not a great musical composer here, I do not know that you are not a great conductor. Your orchestras, a tenor strain, a slavonic strain and a greatest artists of recent years were Americans Whited and Sardou. And your standards in the higher fields of culture are growing yearly."

### NEWS FROM FEDERAL CAPITAL

Postal Post Between Canada and Mexico.

Ottawa, Sept. 28.—Canadian Postage to Mexico begins Friday. The want of this has been one barrier against the establishment of a very large postal system in the country, and will have an actual advantage over the United States.

The Bank of Ottawa is to increase its capital stock by \$500,000. The expansion of the bank's business and additional capital is given as the reason for the increase. The new stock will be offered at \$100, but each share will be issued at \$90 per share.

The time of agriculture returns to the capital more than satisfied with the development of the country. It is believed that the more mixed farming, and especially sheep raising, will be adopted during the next few years, but he realizes that this will come in time, indeed it has already come in many parts.

During the whole course of history, Mr. Fisher met many of the American soldiers who have been lost. He is confident that they will rapidly adapt themselves to Canadian conditions, and will make quick British subjects.

**Car Accident Proves Fatal.**

Toronto, Sept. 28.—Miss M. Peck, of Etobicoke, Ontario, died yesterday morning as the result of a fall from a chair. Miss Peck was returning to the house of a friend on Eglinton Crescent, and was walking to and off Dow's Avenue. The car did not stop there but ran on, and the woman was thrown off when she stood up.

### LIRIGNE BALLOON EXPLODED

Terrible Fate of Passengers When Big Bag Colapsed.

Mouline, France, Sept. 28.—While passing over the National road which leads from Paris to Antibes, and which is the French dirigible military balloons Republique exploded today and fell to the ground. The four men on board were killed. They were Captain Marchall, Lieut. Phaneau and Captains Lefebvre and Bourdier.

Captain Marchall, who was in charge of the airship, tried to stop at Niviers and an automobile containing mechanics was following the balloon. It was not until directly under the airship that the dirigible burst. The car fell straight down, carrying the remains of the envelope and the remaining basket with it. The car was a wreck, but all were dead except Phaneau, but he lived only a few minutes after the accident.

Lieut. Phaneau, who was in command of the automobile, says the balloon suddenly burst and collapsed, and it fell rapidly as he reached the limit of the envelope. The car was covered with the envelope and a smoke came from beneath. With the exception of Captain Marchall, who hurried from the surrounding fields, the envelope was recovered.

The car was entirely crushed, and wire, every mail except Phaneau could be seen.

Captain Marchall was in a sitting posture, his body thrown back and his eyes wide open. The body was completely mangled beneath the cylinder of the motor.

Phaneau's body was lying half upon the ground, the head pointing downward.

Apparently dead in the case of the two men was the unfortunate accident which had occurred to the shock when they struck the earth and the weight of the heavy envelope.

Captain Marchall's skull was crushed.

An airship was flying just above the ground.

"The accident was caused by a gust of wind," he said.

On the strength of the report of the accident, the president of the Royal Aero Club of Great Britain, Dr. G. C. MacKenzie, has issued a warning to all aeroplane drivers to be on the lookout for sudden gusts of wind.

"It is the duty of the Royal Aero Club to issue such a warning," he said.

Throughout Ontario, all cities, with the larger villages of business men, have been issued similar warnings.

Toronto, however, has not been given the warning, probably because the Royal Aero Club has not yet received another copy of the advance of \$6 per cent.

"Other wireless stations have been extremely busy at the present time, and that a number of big projects will be completed before the winter work done before zero weather is at hand."

In British Columbia, Vancouver noted an increase of 10 per cent, which more than offset her loss in the previous month, while Victoria reported an increase of 15 per cent.

"Radio cannot be produced without many reasons for expense," he said.

"It is produced commercially, and the cost of production is not great enough to cover the expenses of the manufacture of radio sets."

"Operating expenses are going steadily upward. The number of stations operating under permit have been increased by 10 per cent per year, and the number of traffic has increased 10 per cent."

**HUSBAND ACTS LIKE DEVIL.**

Chicago Woman's Playful Spouse Still Divorced.

Chicago, Sept. 28.—Because her husband "acted like a devil," she declares, Mrs. Rosamond Blase has filed a petition asking legal separation from him, and has engaged a divorce broker, and a share of property valued at \$160,000.

Practically all the cities included in the list reported an increase in the number of radios, as far as the number of both the architects and engineers who have been engaged in the building of these have suffered a reversal.

"In the East, Sydney again registered an increase of 10 per cent, and Boston 10 per cent; and Montreal, whose figures were taken last week, showed an increase of 7 per cent. This is Sydney's third consecutive week of increase, and has exceeded the corresponding figures of 1908 for each and every month this year."

# DR. PRICE'S CREAM Baking Powder

Made from pure, grape cream of tartar

Makes home baking easy. Nothing can be substituted for it in making, quickly and perfectly, delicate hot biscuit, hot-breads, muffins, cake and pastry. Insures the food against alum.

Pure, Healthy, Reliable

PRISE BAKING POWDER CO., CHICAGO

NOTE.—Inimitable taste! baking powder colored you at lower price, recommended by physicians and dentists. metallic acid & starches to health.

## BLACKFOOT INDIAN MEDICAL PRIESTHOOD

Paper by Dr. John MacLean, Morden, Man., Before British Association Describing this Strongest of Fraudulent Organizations in Existence

At the recent meeting of the British association for the advancement of science, held in Wimborne, the following most interesting paper on "The Blackfoot Medicine Men" was read before the section on Anthropology, by Dr. John MacLean, of Morden, this province.

The fatuity of the medicine men among the Blackfoot Indians is one of the strongest organizations in existence, and, forming a secret society, it is difficult for anyone to penetrate its inner workings relating to its modes of initiation, or its methods of compounding the medicines used in their practice, and in their destroying enemies.

"Medicine Men" does not properly describe them, for they are not medicine men who are also distinguished as shamans, diviners, and priests, for they are the doctors and priests of the tribe, their duties consist in caring for the health of the members of the tribe. They cure diseases by the use of medicine, hypnosis and incantations, and always predict future events in relation to the weather, the movements of animals, and the movements of men, what may happen to the individuals or the tribe, and as priests they preserve the native traditions and initiate the young into the ways of their fathers. The medical priesthood is a more explicit term to use in describing the functions of these men, who under the direction of the secret leaders do not represent the members of the white race.

The Blackfoot tribes comprising the Algonquin stock of Indians divide the fraternity into four grades, the highest being the medicine men, knowledge and experience than the lower, and then comes the medicine man, who is a shaman, and finally the elder, or ceremony man, who is a shaman, ceremony man, initiate. Usually the honors and duties belonging to the various grades are hereditary, the members of the tribe, but there have been women who became noted as medicine men, and these women have had a wide and potent influence as doctors, and though sincere, their authority was never disputed by the tribe. Some of these have known among the Blood Indians, having witnessed their practices upon the members of their tribe, with heavy heart, was the owner of the Medicine Lodge, and the leader of a wide scope skin, upon which were eight faint symbolic symbols of her profession.

**Violent Work of Satan.**  
When a young man has received call to enter the order, and devote his life to the welfare of his people by an important functionary, he becomes very serious, and separates himself from his companions, holding a fast abstinence from the sports of the camp, and in a frenzied mood, he slips away to some deep ravine, where he remains for days, in communion with the gods. Wandering in the deep recesses he fasts and prays until in sleep he sees the spirit of the gods, who falls asleep, and then there comes a vision of the animal which is the symbol of his name, in which there is revealed to him the form of an animal which to become his guide, and to protect him from the ravages of the causes of disease, giving energy to the vital organs, and giving him power to expel evil spirits and tell the secrets of the universe, and this is his own special gift, unknown to any other member of the order. The time of his initiation is usually on the fourth day, that being the sacred number of the tribe, the Algonquin stock of Indians. Awaken from this sleep goes in quest of the animal which he has seen, pursues it until it is caught, and killing skinned and stuffed it, and having skinned and stuffed it, he places it in a safe place, and constant companion. While fasting and praying he punctures his arms and legs, and with a sharp knife, or sharp needle or other sharp instrument and with a knife cuts off the skin from the outside of the body.

**Secretive to Nature.**  
The secretiveness of the medicine men is due to the fact that they are the secretaries of the sun, that the sun is their master, and their secret favors and services are bestowed upon the people because of his power as a conqueror. These were often men of a rogue and thief, were often of a stern and were of stern character, who were truthful and just in their dealing, but were as jealous of their profession, and

for many years at Fort Creek, Alberta, to which the tribe resided, made many sacrifices, and when it was removed by the Rev. George McDonald to Victoria, under the command of the chief medicine of the buffalo to its absence.<sup>2</sup> I have seen several large boulders in northern Alberta, which are covered with pipes, finger and ear-rings lying at their bases, and these lay on the river bottom at the foot of a ravine, which extends from the city of Lethbridge to the crossing of the Belly river. Before the city was located here, a medicine man, writing stone held in awe by the warlike, who has related to me instances of men being sent to him to propitiate the prevailing deity.

### Extraordinary Energetic Power.

Some of the medicine men seem to be possessed of a superhuman power, by which they held the people in continual dread, as they were able to divine the thoughts of others, make predictions of the future relating to individuals or the tribe. By their hypnotic power they could dominate enemies, and increased their influence, using the dread talismans in their practice, and power over the natives. These natives priests that half-breeds and Indians have informed me of instances when a medicine man would pierce his finger at one of his enemies in his presence, and say, "I will kill you, and your body will be covered with scars." Another has said that in three hours he could turn a man's hair. None of these predictions were ever known to fail, instances are also known of a medicine man who said that a man would die at a certain moment, and when the moment arrived, the man died. The medicine men began to decline until he died at the age of 80 years.

High grade medicine, the power of breaking the spell, and the power of the person that is doomed. One of the Cree medicine men touched the head of a sick person, and with his hands and one side of his face became numb, and his neck twisted. After removing the hands from the head, he returned to his room to die. The medicine man fled from the stricken camp, as if they had been pursued by devils, leaving the dying and dead in the lodges.

### Buffalo Meat and Berries.

Living in the open, and their food consisting almost solely of buffalo meat and wild berries, was conducive to health, but as the natives were relegated to the reserves, and no longer had energy to hunt, they became weak, and when they spent more of their time in the lodges, they turned to a sedentary life, and returned to the villages to die. The medicine men fled from the stricken camp, as if they had been pursued by devils, leaving the dying and dead in the lodges.

### Medicine and Its Significance.

The smoke of the pipe has a distinct medicinal quality, which they exert through their prayers and incantations, and give a fair idea of what the winter is like, and the seasons to advance, and stating the stars, they will state in the autumn pretty accurately the weather to come.

This power of prediction is possessed by the men in general, though the medicine men are the most expert.

Medicine and its significance change the weather through their incantations and influence with the primitive.

### Medicine and Its Significance.

The smoke has a distinct medicinal quality, which they exert through their prayers and incantations, as practiced by the medicine men, and which is a great aid to the patient.

Sometimes the Indians, for men and women, will burn bundles of leaves and sticks, and stating the stars, they will state in the autumn pretty accurately the weather to come.

This power of prediction is possessed by the men in general, though the medicine men are the most expert.

Medicine and its significance change the weather through their incantations and influence with the primitive.

## EMMA GOLDMAN NOT PERMITTED TO SPEAK

**Philadelphia Police Present Anarchist From Addressing Audiences Declares She Will Speak Despite Police Interference—Dr. Reitman Said Anarchistic Literature.**

Philadelphia, Sept. 28.—Emma Goldman did not speak at the Odd Fellows Hall of anywhere else in the city last night. Between her and the restrooms she stood and the law, represented by 200 policemen, was the only hall she could speak in.

Six hundred disciples of free speech who had gained admission to the hall 20 cents each to see and hear her, were disappointed.

At eight o'clock the hall was crowded to capacity. The police who were busy selling anarchist literature to those who would buy, but was not buying.

The sidewalk in front of the hall was lined with policemen. Guards were posted at the entrance of the Hotel Wilmette, where Miss Goldman is staying, to keep watch as her supporters gathered outside.

She was accompanied by Horace John Nelson, attorney for the Free Speechers. She did not look very dangerous.

The man whom Attorney Nelson says was Tim O'Leary, assistant superintendent of police, followed in front of the police, stopped in front of her.

"Back, back," is the language she used when the police began to press Miss Goldman and her friends were in the midst of a tumult of excitement between her and another attorney.

"There is no use trying to force me to speak," she said, "I have better got to my office."

**Defied Police.**

Without a word, Mr. Goldman turned around and she and Nelson started over Broad street to the Real Estate Trust building. The crowd of police followed. She and Nelson entered the Real Estate Trust building and the police followed him off.

The police followed. Then Nelson remembered that he had to go to the office and he would come later. She and Nelson left the office and the police followed. At the door of the Nelson office, Miss Goldman turned around and said: "If you attempt to come in here I can't stop you, but I will go outside and let you know when I am ready."

A resolution of the Prince Albert Board of Trade urging that steps be taken to prevent Miss Goldman from leaving the city was endorsed.

**Revolving Door.**

Without a word, Mr. Goldman turned around and she and Nelson started over Broad street to the Real Estate Trust building. The crowd of police followed. She and Nelson entered the Real Estate Trust building and the police followed him off.

The police followed. Then Nelson remembered that he had to go to the office and he would come later. She and Nelson left the office and the police followed. At the door of the Nelson office, Miss Goldman turned around and said: "If you attempt to come in here I can't stop you, but I will go outside and let you know when I am ready."

A resolution of the Prince Albert Board of Trade urging that steps be taken to prevent Miss Goldman from leaving the city was endorsed.

**FORTY STUDENTS ENROLLED.**

Saskatchewan University Opens With Class of This Size.

Saskatoon, Sept. 28.—The Chinese keeper of a gambling joint which was raided on Friday, charged his players with robbing him of his cash. The estimates were discharged with a warning.

The meeting of Saskatchewan lawyers on the arrival of more members timed on the arrival of more members. The work of organization is to be performed.

**Mail service on the Goose Lake.** C.N.R. will mail on Monday, Sept. 29, to the village of Moose Jaw, on the branch by stage.

This was registration day at the University of Saskatchewan. Forty students enrolled. This class starts tomorrow.

**IMPLICATES HIS LAWYERS.**

Wm. Leaking, Who Sold Another Man His Head, Sept. 28.—William Leaking, 21, of 1000 Main St., was held to date of setting of the Supreme Court before Judge Prentiss of selling a pony for \$1000, the property of his son, Tom. Tom's suit was deferred. An interesting feature of the case was the statement of Mr. George G. Lemoine, solicitor of Indian Head, had received the money in question from his son, Tom, and that in another case in which he recently appeared at Indian Head and that he knew nothing about the sale of the son of another man's pony and did not believe to him.

**Impudent Burglary at Indian Head.** Indian Head, Sept. 29.—A daring and impudent burglar was captured last night. Davidson & Co. lately received a large consignment of gold and silver. On Saturday evening the store closed, a wagon drove up to the rear of the store and loading up with the gold and silver, drove away by sewer but it was thought to be merely a bold farmer loading up with the gold and silver to go east to the coast in the intent to go far enough to identify the thief. The Mounted Police are investigating.

**Runaway Accident in Saskatoon.** Saskatoon, Sept. 29.—A runaway accident occurred last night. A team belonging to J. D. McLean, 1000 Main St., ran away three miles. J. McLean, of London, Ont., jumped from the rig and was severely bruised. The horses were broken although he was badly bruised. The horses were badly hurt and never stayed in the rig and was not hurt.

**Bashkerville Chief Resigns.** Saskatoon, Sept. 29.—Fire Chief Gilbert Jenkins has resigned. He had been a member of the fire department nearly in the spring and proved himself an efficient officer. The decision to resign and regret is expressed at his departure. He goes back East on a visit.

## STRATHCONA NEWS

**LEONARD SNEE APPOINTED CHIEF OF FIRE DEPARTMENT.**

Strathcona City Council Made Selection at Last Night's Meeting. Thos. Richards will Supervise the Work of Fire Department. New Fire Station on Sunday Street By-Law Again Postponed.

At the regular weekly meeting of the Strathcona City Council last night the chief of the fire department was appointed to succeed late Chief MacPherson. The new chief was selected because he had been identified with the brigade for some years and is one of the most efficient members of the department.

Six hundred disciples of free speech who had gained admission to the hall 20 cents each to see and hear her, were disappointed.

At eight o'clock the hall was crowded to capacity. The police who were busy selling anarchist literature to those who would buy, but was not buying.

The sidewalk in front of the hall was lined with policemen. Guards were posted at the entrance of the Hotel Wilmette, where Miss Goldman is staying, to keep watch as her supporters gathered outside.

She was accompanied by Horace John Nelson, attorney for the Free Speechers. She did not look very dangerous.

**Correspondence.**

A letter was read from L. E. Gardner, south, who had been enroute to Dawson, panning for gold along the waterways in the Yukon River.

Joseph V. Kilduff, agent for The Standard Plumbing & Heating Co., advised he had been engaged to put up a fence and street in Waterdale. The letter was addressed to Mr. E. E. Edwards, 1305 10th Ave. City Auditor Cox wrote asking the company to give instructions with reference to the amount of the bond required to make the square fence stand.

The former has been transferred from Westdale, and the latter from Lloydminster.

Mr. and Mrs. Arthur Galbraith have called upon all members of the Canadian Bank of Commerce, filling the positions of manager and teller.

Mr. Galbraith has been engaged to manage the branch office of the Hudson's Bay Company.

**Death.**

Address to Earl Grey.

Speaking of the reception to Earl Grey, Mayor Duggan said that the city had invited the Canadian Governor Bullock to present an address and he had replied that he would be unable to do so.

Mr. Duggan said: "I am sorry to say that we have been unable to get in touch with Lord Strathcona and arrived."

Three calls addressed to the fact that the street railway had torn up the crossing at Fourth street east.

Alb. Bush said that Fifth street, east, where the street railway was just installed, was in a terrible condition. He would like to know who was responsible for the state of the street.

**Reports of Committee.**

Alb. Richardson, chairman of the fire committee, said that the committee were of the opinion that the work on the fire hall should be supervised by the city engineer.

On motion of Alb. Bush it was agreed that the city engineer should be in charge of the architect were defective.

**New Fire Chief.**

Alb. Richardson, chairman of the fire committee, said that he had received a report from the Canadian Fire Protection Association that Leonard was appointed to succeed late chief MacPherson.

Mr. S. Martin, 1000 Main St., was appointed to the post.

Alb. Bush asked what committee the responsibility for the sprinkling of the building belonged. Festus Young, 1000 Main St., said that it was also decided that the purchase of a new fire hall was a necessity of the near future. A motion was passed to meet again when the report of the public works committee was made.

**Alb. Sheppard Criticizes.**

Alb. Sheppard, the chairman of the fire committee, said that the fire hall was in for considerable criticism, it being the opinion of many that the building was not fit for the department with a high hand.

Seven instances were given when he referred to the building as being a "pig sty." It was agreed that those brought to the council and passed over the accounts.

**The Accounts.**

The following accounts were passed during the evening:

**SPORTING NEWS****BASEBALL****SEASON DRAWING ITS CLOSE.**

New York, Sept. 29.—The Eastern League championship seems ended today. Rochester, with 96, is safe; Pittsburg, with 90, is in trouble. The Rochester's were managed by John Gandy, who transferred them from the Indians, and it is a wonder a year's time. Rochester previously had not won a pennant since 1901. Newark this year has been a team of evidence. The champion Baltimore's of 1908, in a weak season, landed in seventh place. This is the final and official standing of the clubs:

	Win.	Lost.	P.C.
Rochester	96	38	.720
Newark	96	67	.562
Providence	96	70	.555
Toronto	72	72	.477
Buffalo	72	79	.477
Montreal	69	83	.455
Baltimore	68	84	.446
Jersey City	63	87	.435
